

# Intro to Web Design

Under Construction

- [Resources](#)

# Resources

This will serve less as a direct guide to how to do web design, but put you on a guided course of online courses available for web design. Please follow the lessons in the order outlined below.

You will need a [Codecademy](#) account to access the below courses

1. [Learn HTML: Fundamentals](#)

Build an important foundation for creating the structure and content for web pages.

2. [Learn HTML](#)

Start at the beginning by learning HTML basics — an important foundation for building and editing web pages.

3. [Learn CSS: Introduction](#)

Learn how to use CSS (Cascading Style Sheets) to style and visually organize HTML pages.

4. [Learn CSS](#)

In this CSS tutorial, you'll learn how to add CSS to visually transform HTML into eye-catching sites.

5. [Learn Intermediate CSS](#)

Learn how to implement elegant transitions, create new layouts and serve users with dynamic needs.

If you wish to continue your HTML/CSS learning view the full [catalog](#).

6. [Learn JavaScript: Fundamentals](#)

Learn how to control the flow of a program and use JavaScript to power dynamic behaviors on websites.

7. [Learn JavaScript](#)

Learn how to use JavaScript — a powerful and flexible programming language for adding website interactivity.

8. [Learn Intermediate JavaScript](#)

Take your JavaScript knowledge to the next level by learning how to use advanced functions to create more efficient programs.

9. [Building Interactive JavaScript Websites](#)

Learn the Document Object Model, the interface between JavaScript and HTML elements, and combine HTML, CSS, and JavaScript into exciting interactive sites!
